Under current Medicare reimbursement rules that typically don't cover preventive O&P care, patients often receive less expensive, but functionally inferior devices that leave them at risk for long-term complications.

Insurance companies pay the same for a quality brace compared to a cheap inferior product.

Ask your medical professional for a quality orthoses from Anatomical Concepts, Inc.

PRAFO® Orthosis

RAPO™ Orthosis

All Anatomical Concepts' products are designed and manufactured with pride in the USA. Our high quality, superior-functioning products are cost-effective and deliver more positive patient outcomes.
